

# Singgih Budi Purnadi

## Frontend Mobile Engineer

My name is Singgih, a frontend developer specializing in websites and mobile applications. I have successfully developed blockchain-based websites and achieved sales targets during ICO and private sales. Currently, I work as a **Frontend Mobile Engineer**, focusing on designing and implementing mobile interfaces, creating responsive website interfaces, and ensuring seamless user experiences across devices.

Additionally, I have expertise in Geographic Information Systems (GIS) or Geographic Information Science (GIScience) for developing applications related to maintaining highway infrastructure. Leveraging my skills in programming languages such as PHP, JavaScript, React Js, Dart and TypeScript, along with my understanding of UI/UX principles, I have created GIS-based systems to effectively manage toll road maintenance.

I am also familiar with various tools like Git, Jira, Notion, and Trello, which help in project management and collaboration. I am committed to delivering high-quality solutions that leverage technology to improve infrastructure and enhance lives. Please feel free to contact me via the details listed on my CV.
